## TABS DOCUMENTATION

### 1.1 AddItemView

From `src/ui/pages/view/AddFoodItemView.tsx`

#### 1.1.1 Description

View to add items

#### 1.1.2 Parameters

switchView-Function	Callback for switching views
submitFunction	Callback for submitting

#### 1.1.3 Returns

React element

### 1.2 FolderBackdropActionButton

From `src/ui/fragments/view/FolderBackdropActionButton.tsx`

#### 1.2.1 Description

Button styled for a folder backdrop

## 1.2.2 Parameters

info	Title of the button
buttonFunction	Callback function
argument	Argument to pass into callback function

## 1.3 FolderBackdropListFragment

From `src/ui/fragments/view/FolderBackdropFragment.tsx`

### 1.3.1 Description

Backdrop container styled to look like a folder

### 1.3.2 Parameters

props	Fragment configuration
-------	------------------------

### 1.3.3 Returns

React element for the function

## 1.4 FolderBackdropTextInputField

From `src/ui/fragments/view/FolderBackdropTextInputField.tsx`

### 1.4.1 Description

Text field styled for a folder backdrop.

### 1.4.2 Parameters

info	Hint and title of the text field
backRefFunction	Callback function when textfield is edited

### 1.4.3 Returns

Text field React element

## 1.5 FolderBackdropTextInputFieldArgument

From `src/ui/fragments/view/FolderBackdropTextInputField.tsx`

### 1.5.1 Description

### 1.5.2 Fields

title	Title of the text field
hint	Hint for the text field

## 1.6 HomePage

From `src/ui/pages/view/homePage.tsx`

### 1.6.1 Description

Home page of the app

### 1.6.2 Parameters

navigation	Navigation element
------------	--------------------

### 1.6.3 Returns

React element

## TABS DOCUMENTATION

### 2.1 BillDocument

From `src/types/bill.ts`

#### 2.1.1 Description

Represents the format of Bill object in the database

#### 2.1.2 Fields

billId	ID of document
houseId	
name	Name of bill
amount	Amount to be paid
split	Those who the bill is to be split amongst
dateCreated	
dateDue	
status	

### 2.2 billResolver

From `src/resolvers/billResolver.ts`

#### 2.2.1 Description

Resolver for bill

## 2.2.2 Methods

<i>billResolver.getBill</i>
<i>billResolver.addBill</i>
<i>billResolver.modifyAmount</i>

## 2.3 billResolver.addBill

From `src/resolvers/billResolver.ts`

### 2.3.1 Description

Creates a bill

### 2.3.2 Parameters

billId	
houseId	
name	
amount	
split	
dateCreated	
dateDue	
status	

### 2.3.3 Returns

the document of the newly created bill
--

## 2.4 billResolver.getBill

From `src/resolvers/billResolver.ts`

### 2.4.1 Description

Finds bills corresponding to the given house

## 2.4.2 Parameters

houseId	
---------	--

## 2.4.3 Returns

an array of bill documents matching the given house
---

## 2.5 billResolver.modifyAmount

From `src/resolvers/billResolver.ts`

### 2.5.1 Description

Modifies the amount of a given bill

### 2.5.2 Parameters

billId	
amount	

### 2.5.3 Returns

the new amount if successful, false otherwise
---

## 2.6 CategoryDocument

From `src/types/category.ts`

### 2.6.1 Description

Represents the format of Category object in the database

## 2.6.2 Fields

inventoryId	ID of inventory that this document belongs to
categoryId	ID of document
category-Name	
categoryDesc	
isRestricted	Whether or not non-owners/admins can make changes
owner	
admins	

## 2.7 categoryResolver

From `src/resolvers/categoryResolver.ts`

### 2.7.1 Description

Resolver for category

### 2.7.2 Methods

<i>categoryResolver.addCat</i>
<i>categoryResolver.toggleRestriction</i>
<i>categoryResolver.addAdmin</i>
<i>categoryResolver.removeAdmin</i>
<i>categoryResolver.changeCatName</i>
<i>categoryResolver.changeCatDesc</i>
<i>categoryResolver.findCatsByInvId</i>
<i>categoryResolver.hasPermission</i>

## 2.8 categoryResolver.addAdmin

From `src/resolvers/categoryResolver.ts`

### 2.8.1 Description

Adds a given user as an admin to the given category

## 2.8.2 Parameters

userId	
categoryId	
targetUser	

## 2.8.3 Returns

true if the operation was successful, false otherwise
---

## 2.9 categoryResolver.addCat

From `src/resolvers/categoryResolver.ts`

### 2.9.1 Description

Creates a category in the given inventory

### 2.9.2 Parameters

userId	
inventoryId	
category- Name	
categoryDesc	
isRestricted	

### 2.9.3 Returns

the ID of the newly created category, null otherwise
--

## 2.10 categoryResolver.changeCatName

From `src/resolvers/categoryResolver.ts`

### 2.10.1 Description

Changes the given category's description

### 2.10.2 Parameters

userId	
categoryId	
categoryDesc	

### 2.10.3 Returns

true if the operation was successful, false otherwise
---

## 2.11 categoryResolver.findCatsByInvId

From `src/resolvers/categoryResolver.ts`

### 2.11.1 Description

Finds categories corresponding to the given inventory

### 2.11.2 Parameters

inventoryId	
-------------	--

### 2.11.3 Returns

an array of category documents in the given inventory
---

## 2.12 categoryResolver.hasPermission

From `src/resolvers/categoryResolver.ts`

### 2.12.1 Description

Checks if the given user has permission to modify the category

### 2.12.2 Parameters

userId	
categoryId	

### 2.12.3 Returns

true if the user has permission, false otherwise
--

## 2.13 categoryResolver.removeAdmin

From `src/resolvers/categoryResolver.ts`

### 2.13.1 Description

Removes a given user as an admin in the given category

### 2.13.2 Parameters

userId	
categoryId	
targetUser	

### 2.13.3 Returns

true if the operation was successful, false otherwise
---

## 2.14 categoryResolver.toggleRestrictionFunc

From `src/resolvers/categoryResolver.ts`

### 2.14.1 Description

Toggles the restriction setting of the given category

### 2.14.2 Parameters

userId	
categoryId	

### 2.14.3 Returns

true if the operation was successful, false otherwise
---

## 2.15 DebtDocument

From `src/types/debt.ts`

### 2.15.1 Description

Represents the format of Debt object in the database

### 2.15.2 Fields

debtId	ID of document
debtTo	
debtFrom	
amount	Amount of debt
description	
dateCreated	

## 2.16 debtResolver

From `src/resolvers/debtResolver.ts`

## 2.16.1 Description

Resolver for debt

## 2.16.2 Methods

<i>debtResolver.getDebtsTo</i>
<i>debtResolver.getDebtsFrom</i>
<i>debtResolver.getDebts</i>
<i>debtResolver.addDebt</i>
<i>debtResolver.modifyAmount</i>

## 2.17 debtResolver.addDebt

From `src/resolvers/debtResolver.ts`

### 2.17.1 Description

Creates a debt

### 2.17.2 Parameters

debtId	
debtTo	
debtFrom	
amount	
description	
dateCreated	

### 2.17.3 Returns

the document of the newly created debt
--

## 2.18 debtResolver.getDebts

From `src/resolvers/debtResolver.ts`

### 2.18.1 Description

Searchs for all the debts matching the parameters

### 2.18.2 Parameters

debtFrom	
debtTo	

### 2.18.3 Returns

a list of matching debt documents
-----------------------------------

## 2.19 debtResolver.getDebtsFrom

From `src/resolvers/debtResolver.ts`

### 2.19.1 Description

Searchs for all the debts that the given user owes

### 2.19.2 Parameters

debtFrom	
----------	--

### 2.19.3 Returns

a list of debt document that the given user owes
--

## 2.20 debtResolver.getDebtsTo

From `src/resolvers/debtResolver.ts`

### 2.20.1 Description

Searchs for all the debts owed to the given user

### 2.20.2 Parameters

debtTo	
--------	--

### 2.20.3 Returns

a list of debt document owed to the given user
--

## 2.21 debtResolver.modifyAmount

From `src/resolvers/debtResolver.ts`

### 2.21.1 Description

Modifies the given debt's amount

### 2.21.2 Parameters

debtId	
amount	

### 2.21.3 Returns

the new amount, false otherwise
---------------------------------

## 2.22 InventoryDocument

From `src/types/inventory.ts`

### 2.22.1 Description

Represents the format of Inventory object in the database

### 2.22.2 Fields

houseId	ID of house that this document belongs to
---------	---

## 2.23 inventoryResolver

From `src/resolvers/inventoryResolver.ts`

### 2.23.1 Description

Resolver for inventory

### 2.23.2 Methods

<i>inventoryResolver.findInventory</i>
<i>inventoryResolver.createInventory</i>

## 2.24 inventoryResolver.createInventory

From `src/resolvers/inventoryResolver.ts`

### 2.24.1 Description

Creates an inventory for a given house

### 2.24.2 Parameters

houseId	ID of the house the inventory belongs to
---------	--

### 2.24.3 Returns

ID of the current inventory
-----------------------------

## 2.25 inventoryResolver.findInventory

From `src/resolvers/inventoryResolver.ts`

### 2.25.1 Description

Finds inventories for a given house

### 2.25.2 Parameters

houseId	ID of the house that the inventories belong to
---------	--

### 2.25.3 Returns

an array of IDs that belong to inventories that match the given houseId
---

## 2.26 ItemDocument

From `src/types/item.ts`

### 2.26.1 Description

Represents the format of Item object in the database

### 2.26.2 Fields

name	Name of document
categoryId	ID of category that this document belongs to
quantity	
expiration	
tags	

## 2.27 itemResolver

From `src/resolvers/itemResolver.ts`

## 2.27.1 Description

Resolver for item

## 2.27.2 Methods

<i>itemResolver.hasPermission</i>
<i>itemResolver.findItem</i>
<i>itemResolver.findItemsByCategory</i>
<i>itemResolver.addItem</i>
<i>itemResolver.subtractItem</i>
<i>itemResolver.createItem</i>
<i>itemResolver.modifyItemName</i>
<i>itemResolver.modifyItemCategory</i>

## 2.28 itemResolver.addItem

From `src/resolvers/itemResolver.ts`

### 2.28.1 Description

Decrements the quantity of the given item by 1

### 2.28.2 Parameters

userId	
itemId	

### 2.28.3 Returns

true if the operation was successful, false otherwise
---

## 2.29 itemResolver.createItem

From `src/resolvers/itemResolver.ts`

### 2.29.1 Description

Creates an item in the given category

### 2.29.2 Parameters

userId	
categoryId	ID of the category
name	Name of the item
expiration	

### 2.29.3 Returns

the ID of the newly created item

## 2.30 itemResolver.findItem

From `src/resolvers/itemResolver.ts`

### 2.30.1 Description

Finds the item with the given ID

### 2.30.2 Parameters

itemId	
--------	--

### 2.30.3 Returns

the item document matching the given ID

## 2.31 itemResolver.findItemsByCategory

From `src/resolvers/itemResolver.ts`

### 2.31.1 Description

Finds the items within a given category

### 2.31.2 Parameters

categoryId	
------------	--

### 2.31.3 Returns

an array of item documents that are in the given category
---

## 2.32 itemResolver.hasPermission

From `src/resolvers/itemResolver.ts`

### 2.32.1 Description

Checks if the given user has permission to modify the category

### 2.32.2 Parameters

userId	
categoryId	

### 2.32.3 Returns

true if the user has permission, false otherwise
--

## 2.33 itemResolver.modifyItemCategory

From `src/resolvers/itemResolver.ts`

### 2.33.1 Description

Modifies the given item's category

### 2.33.2 Parameters

userId	
itemId	
categoryId	ID of the item's new category

### 2.33.3 Returns

true if the operation was successful, false otherwise
---

## 2.34 itemResolver.modifyItemName

From `src/resolvers/itemResolver.ts`

### 2.34.1 Description

Modifies the given item's name

### 2.34.2 Parameters

userId	
itemId	
name	The item's new name

### 2.34.3 Returns

true if the operation was successful, false otherwise
---

## 2.35 UserDocument

From `src/types/user.ts`

### 2.35.1 Description

Represents the format of User object in the database

### 2.35.2 Fields

email	
password	

## 2.36 userResolver

From `src/resolvers/userResolver.ts`

### 2.36.1 Description

Resolver for the user

### 2.36.2 Methods

userResolver me
userResolver signUp
