

## BURNDOWN

In the burndown chart, we can see that unlike previous sprints, we were able to complete a substantial amount of story points near the beginning of the sprint. There was not much work done until the final days of the sprint due to exams and assignment deadlines for many of our team members. There is a spike on the last day of the sprint.

Last sprint, our velocity was 125 story points.

This sprint, our velocity is 147 story points.

Our velocity has changed due to our team feeling more confident in taking on more tasks.
